The Small Business Website Checklist

25 things every local service website needs to turn visitors into calls.

How to use it: open your website **on your phone** and check off each item you can find in under 10 seconds.

Get found on Google

- [ ] 1 Your service and town are in each page's title (e.g. "Plumber in Bayside | Smith Plumbing")
- [ ] 2 Each main service has its own page (drains, water heaters, repairs…)
- [ ] 3 Each town or area you serve is named on a page
- [ ] 4 Your business name, address and phone are written exactly the same everywhere (website, Google, Facebook)
- [ ] 5 Your Google Business Profile is claimed, verified and links to your website
- [ ] 6 Your site is added to Google Search Console (free) so you can see how people find you

Make it easy to call you

- [ ] 7 Your phone number is at the top of every page
- [ ] 8 Tapping the number on a phone starts a call
- [ ] 9 Every page has a "Get a quote" button
- [ ] 10 Your quote form is short: 5 fields or fewer
- [ ] 11 Your hours, and whether you take emergencies, are easy to spot
- [ ] 12 You say how fast you reply ("We call back within 1 business day"), and you keep the promise

Earn trust fast

- [ ] 13 Real photos of you, your team, your truck and your work (no stock photos of smiling strangers)
- [ ] 14 At least 3 recent reviews, with first names and towns
- [ ] 15 Licenses, insurance and certifications are listed
- [ ] 16 Your About page says who you are and how long you've been doing this
- [ ] 17 Prices or "starting at" prices for common jobs
- [ ] 18 Your guarantee or warranty is spelled out in plain words

Work on every phone

- [ ] 19 Pages load in about 3 seconds or less on mobile data
- [ ] 20 Text is readable without zooming, and buttons are big enough for a thumb
- [ ] 21 No pop-ups cover the screen before people can see what you do

Keep it professional

- [ ] 22 You use your own domain (yourbusiness.com), not a free subdomain
- [ ] 23 There's a padlock in the address bar (HTTPS)
- [ ] 24 Hours, prices, photos and the © year are up to date
- [ ] 25 A privacy page explains what your contact form collects

The 5-second test

Hand your phone to a friend, open your site, and ask: **"What do we do, where, and how do you reach us?"** If they can't answer in 5 seconds, start with items 7, 9 and 13.

Scored under 20? Our **Harbor** website template has the website items built in: tap-to-call, a quote button on every page, service and town pages, reviews, licenses, upfront pricing, and a setup guide written for business owners. **See it live → knadigitalstudio.com/templates/harbor**
